

Dr. Fayaz Ahmed Shaik, MDS

- ✓ **Senior Consultant – Endodontics & Restorative Dentistry, FMS Dental**

Executive Profile

Dr. Fayaz Ahmed Shaik is a highly experienced endodontist and restorative dentist with over 17 years of clinical expertise in comprehensive dental care. Known for his precision in diagnosis and excellence in treatment execution, he specializes in advanced endodontic procedures and aesthetic restorative dentistry.

His clinical approach is rooted in preserving natural dentition through evidence-based, minimally invasive techniques. Dr. Fayaz combines sound clinical judgment with contemporary technologies to deliver predictable, patient-centric outcomes, particularly in complex root canal treatments and restorative rehabilitation.

With a strong foundation in both general dentistry and specialty endodontics, he brings a well-rounded perspective to treatment planning, ensuring functional longevity alongside aesthetic excellence.

Core Clinical Expertise

Dr. Fayaz's clinical focus includes advanced endodontic and restorative procedures such as:

- ✓ Single-visit and multi-visit root canal treatments
- ✓ Retreatment endodontics and management of failed RCT cases
- ✓ Aesthetic restorative dentistry and smile rehabilitation
- ✓ Direct and indirect composite restorations
- ✓ Management of dental caries and pulp pathology
- ✓ Post and core restorations for structurally compromised teeth
- ✓ Conservative approaches to tooth preservation

Clinical Strengths

- ✓ Strong diagnostic acumen with the ability to quickly identify and manage complex dental conditions
- ✓ Extensive experience across a wide spectrum of dental treatments
- ✓ Focus on pain-free, patient-friendly endodontic procedures
- ✓ Integration of restorative and endodontic protocols for long-term success
- ✓ Emphasis on conservative dentistry and preservation of natural tooth structure

Research & Publications

Dr. Fayaz has contributed to scientific research with publications in reputed international journals, reflecting his commitment to advancing endodontic materials and techniques.

Notable Publications:

- ✓ Influence of strontium-containing fluorophosphate glass on the structural and mechanical behavior of MTA
(Journal of the Mechanical Behaviour of Biomedical Materials)
- ✓ Impact of strontium-added fluorophosphate glass on the physico-chemical properties of mineral trioxide aggregate
(Ceramics International)

Thesis:

An In Vitro Evaluation of Physical Properties of 2.5% Strontium Fluorophosphate Bioactive Glass Incorporated MTA

Clinical Philosophy

Dr. Fayaz believes that successful endodontic care lies in precision, preservation, and predictability. His treatment philosophy emphasizes:

- ✓ Early and accurate diagnosis of pulpal and periapical conditions
- ✓ Conservative intervention to retain natural teeth wherever possible
- ✓ Use of advanced materials and protocols for long-term success
- ✓ Patient comfort and minimally invasive techniques
- ✓ Integration of aesthetics with functional rehabilitation

Commitment to Excellence

With a blend of extensive clinical experience and advanced specialty training, Dr. Fayaz continues to deliver high-quality endodontic care tailored to individual patient needs. His dedication to continuous learning and clinical excellence ensures that patients receive modern, reliable and effective dental solutions.
